

MAXIMISE THE IMPACT OF GRANT FUNDING WITH GAURI

- ❖ Deploy your new solution in weeks, rather than months
- ❖ Configure ready-built functionality to the specific needs of your business
- ❖ Solid base for extension
- ❖ Fixed time, fixed scope and fixed cost
- ❖ Based on simplified ASAP of Discover -> Start -> Deploy -> Run

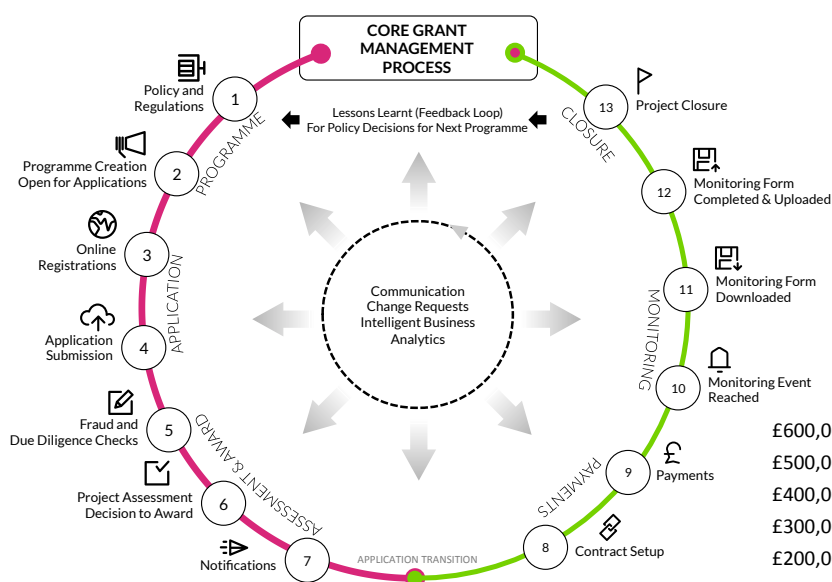

Using Gauri's SAP Grantors Management Rapid Deployment Solution, you can maximise the quality of your grants funding, streamline your processes and monitor outcomes on a reliable platform.

The solution provides transparency, accountability and compliance enabling you to focus on what is important - efficient evaluation of applications and distribution of funds.

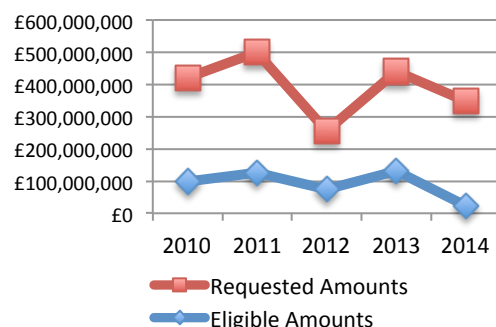

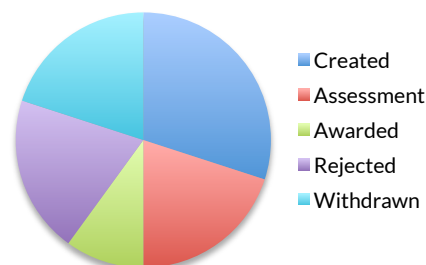

STREAMLINE AND IMPROVE GRANTS MANAGEMENT

Economic hardship have placed a greater burden on foundations and charities. Significant amounts of money are distributed through Grant Funding, so it is essential that this is done in an effective and efficient manner.

Gauri's RDS solution provides a broad set of benefits, including an intelligent scoring mechanism to ensure consistent judgment, a risk-based approach to ensure proportionate effort, support and control is applied; and a set of rich analytics to provide business intelligence, transparency and accountability.

Status of Applications

OPTIONAL ENHANCEMENTS

- We also offer an enhanced solution, which provides more advanced functionality for grantors and foundations with more specific requirements. The additional components within the enhanced solution are also available as add-ons to the core-RDS solution. These include, but are not limited to:
 - **Adobe Interactive Forms** – integrated directly with the system to remove manual data capture in the Application, Assessment and Change Request processes
 - **SAP Fiori** – enhanced look and feel to maximise usability
 - **Grantee Portal** – Online self-service for applicants and grant holders that is fully compatible with mobile devices

5%-12%

*operational cost of distributing “traditional grants” in the UK public sector (£2bn-£4.8bn).
... UK CABINET OFFICE*

ASSUMPTIONS

- 10-50 users
- Standard scope with configuration
- No migration from legacy system is within scope
- 3 weeks of “train-the-trainer” support
- 10 days of go-live support
